

Homeschool Biology Crossword Puzzle

High School Bio Vocab Words

ACROSS	DOWN
1. make proteins	2. makes skin pigment
3. outer layer of bacteria	5. studded with proteins
4. opposite of oil, in biology	7. type of white blood cell
6. chemical in red blood cells	8. like tails
10. like a tail	9. lets water in and out of the cell
14. brain or nerve cell	11. just one cell
15. make the centriole	12. iron blood disease
16. store cell waste	13. hold the cytoplasm in
22. where the axon starts	17. made in ribosomes
24. protects axon	18. units of axon protection
25. hairlike projections	19. lacks a nucleus
27. power the cell	20. movement
28. red blood cells	21. needle sharp mineral
29. long fingerlike projections	23. smallest unit of life
31. gaps in the axon protectors	26. center of plant cell
32. really cyanobacteria	30. ring of DNA
34. center of the center	33. hold the DNA in
35. it's alive!	36. skin cells
37. transports proteins	38. slimy type of bacteria
39. tiny organelles in the cytoplasm	40. a cell with a nucleus
43. body of brain or nerve cell	41. surrounds the cell membrane
45. toxic mineral	42. crystalized skin pigment
47. another name for cell membrane	44. environmental hazard
51. defines the central plant cell	46. outer layer of skin
56. stores amylose (starch)	48. water in the blood
58. surrounds the cytoplasm	49. packages up proteins
59. long tail of a nerve cell	50. has a nucleus
65. stud the ER	52. stores the recipes for protein making
66. more than one cell	53. center of the cell
67. hairlike projections	54. keeps the DNA in
68. watery inside of a cell	55. where the axon ends
71. like an empty cave	57. food poisoning bacteria
72. not studded with proteins	60. photosynthesis happens here
74. a cell that lacks a nucleus	61. homeschool bio course creator
75. most common type of bacteria	62. oil secreted by capsule
76. similar to bacteria	63. has peroxides
	64. stop bleeding
	68. shapes cell
	69. typical prokaryotes
	70. used in cell division
	73. responsibility of red blood cells
